

# **GRADED CLASS ACTIVITY**

## **BSIT AND DIT**

Patrick's monthly salary is 900,000 Uganda shillings. He spends on electricity, water, feeding and transport monthly. You are required to come up with a program which asks Patrick to enter his monthly expenditure, then lets him know if his salary is enough to cater for his expenses?

- i. Use a flowchart to design this program
- ii. Use C-programming language to develop a program for this.
